

Missouri Department of Elementary and Secondary Education

— Making a positive difference through education and service —

April 4, 2008

Since MAP testing has begun, please remember that students currently taking MoVIP courses who are also enrolled in the public school system are expected to take their MAP tests in the public school setting. As part of the MoVIP enrollment process, the district MoVIP site facilitator has been receiving e-mail notification of students known to be in your district at the time of each students' enrollment. We also have this information available on the DESE web applications that can be accessed at any time. Please be sure you are including these students in your district MAP testing to meet the expected requirements. If you have already begun your testing and perhaps had not included these students, please take the time to include them in any and all makeup sessions to avoid any and all issues associated with testing. For your reference, this notification has been sent to the superintendent, the district assessment contact and the district MoVIP site facilitator as indicated in the core data system. The MoVIP office has received several calls and wants to make sure that all prospective parties understand their responsibilities.

Thank you.

Curt Fuchs
Director of Virtual Education

Dr. Andrea Wood
Director of Assessment
